

CSS Basics

Task 1

Some light reading

1. Read through the CSS section on WebPlatform.org (<http://docs.webplatform.org/wiki/css>)
2. Look at the CSS Reference @ Mozilla Developer Network (<https://developer.mozilla.org/en-US/docs/Web/CSS/Reference>)
3. Read the first 10 chapters of Getting started with CSS @ Mozilla Developer Network (https://developer.mozilla.org/en-US/docs/Web/Guide/CSS/Getting_started?redirectlocale=en-US&redirectslug=CSS%2FGetting_Started)

Task 2

Create a simple HTML page including

1. At least 5 long paragraphs of text
2. Make some of the text bold
3. Make some of the text italic
4. Add a few links
5. Add All 6 heading levels
6. Unordered list - at least 2 levels deep, Ordered list - at least 2 levels deep

Task 3

Style the HTML document from Task2

1. Add some color to the text
2. Add border styles to the lists
3. Change the background of the page

4. Play around with styles, try stuff out!
