

Layouts and Positioning

Task 1

Build a form with the following fields:

```
* Login information (fieldset)
  * Username
  * Email

* Additional information (fieldset)
  * First Name
  * Last Name
  * Website
  * Biography

* Social networks (fieldset)
  * Twitter
  * Facebook
  * Github
  * Last.fm
```

Task 2

Take the form from Task1 and add versatility of layout. By applying one class to the form element labels and input fields should be on one line. Exactly like the demo in the lecture.

Task 3

Take the form from Task2 and:

1. Add a list of interests to the form (Checkboxes)
1. Add an option to select Gender (Radio buttons)
1. Add a Country option
1. Add a City option
1. Add a Musical tastes section
