

# Typography

## Task 1

---

1. Copy Giraffe file from Lecture 2
2. Start writing your own typography CSS file
3. Play around with different values for font-size, line-height and spacing of the content
4. Create page.css file to hold design styles for your page

## Task 2

---

1. Select a different article from wikipedia and repeat the process.
2. Practice working with big HTML files.

## Task 3

---

1. Create a page with nested lists.
2. Style the different list types and levels of the lists.

## Task 4

---

1. Create a page with lots of copy
2. Add blockquotes and style them nicely

## Task 5

---

1. Create a single HTML document with as many different elements as you can think of.
2. Add styles to cover everything
